

MEMORY

MEMOLUB MEMORY SERIES

KNOWLEDGE BASE

DIMENSIONS

120cc
Grease & Oil Cartridges
120cc | 4oz

240cc
Grease & Oil Cartridges
240cc | 8.1oz

480cc
Grease & Oil Cartridges
480cc | 16.2oz

OIL R-500
Refillable Oil Reservoir
500cc | 16.9oz

PRECAUTIONS

- Do not open the housing: loaded spring
- Hold MEMOLUB down during manual checks
- Leq <70 dB
- Use MEMOLUB only for greasing machinery
- Use only lubricant cartridges and batteries recommended by the manufacturer

INSIDE THE BOX

MEMOLUB® EPS MEMORY
Pump

MEMOLUB® Housing Kit

MEMOLUB® EPS Memo Kit

SETTINGS & INSTALLATION

FREQUENCY SETTINGS

MEMO COLOR COMBINATION	DOSING PERIODICITY	MAX. DAILY OUTPUT*	REFILLING FREQUENCY VS. CARTRIDGE CONTENT (120CC)	REFILLING FREQUENCY VS. CARTRIDGE CONTENT (240CC)	REFILLING FREQUENCY VS. CARTRIDGE CONTENT (480CC)
	1 hour	14.4 cm ³ /day	0.25 month	0.5 month	1 month
	3 hours	7.2 cm ³ /day	0.5 month	1 month	2 months
	6 hours	2.4 cm ³ /day	1.5 months	3 months	6 months
	12 hours	1.2 cm ³ /day	3 months	6 months	12 months
	16 hours	0.9 cm ³ /day	4 months	8 months	16 months
	24 hours	0.6 cm ³ /day	6 months	12 months	-
	48 hours	0.3 cm ³ /day	12 months	-	

*Maximum daily output without stroke washers.

VOLUME SETTINGS [CC/DAY]

NUMBER OF STROKE WASHERS*	MEMO RINGS COMBINATION						
							
	14.4	7.2	2.4	1.2	0.9	0.6	0.3
	13.5	6.75	2.25	1.13	0.84	0.56	0.28
	12.6	6.3	2.1	1.05	0.79	0.53	0.26
2 	11.7	5.85	1.95	0.97	0.73	0.49	0.24
3 	10.8	5.4	1.8	0.9	0.68	0.45	0.22
4 	9.9	4.95	1.65	0.82	0.62	0.41	0.21
5 	9	4.5	1.5	0.75	0.56	0.38	0.19
6 	8.1	4.05	1.35	0.67	0.51	0.34	0.17

*The circlip must always be added on top of the washers.

REMOTE INSTALLATION DISTANCES

TYPE OF INSTALLATION	MAXIMUM DISTANCE
Single point	8m
Multipoint	6m

SPECIFICATIONS

ELECTRIC SPECIFICATIONS

	MEMOLUB MEMORY
Power Source	External Power Supply (min 15W - 0.6A)
Voltage	24V DC
Short circuit protection	Yes
Stroke duration	8 seconds
Minimum stroke interval	15 minutes

OTHER SPECIFICATIONS

	MEMOLUB MEMORY
Temperature exposure range	-15°C to 50°C*
Connections	1/4 BSP
Lubricants	Oil and Grease (up to NLGI #2 with an oil base between 100 and 460 cSt)**
Maximum Stroke Pressure	25 bar / 350 PSI

* Lubricant adapted for low temperatures.

** For any other viscosity level please contact your local distributor.

INSTALLATION GUIDELINES

DIRECT INSTALLATION

REMOTE INSTALLATION

CARTRIDGE REPLACEMENT GUIDELINES

Open (fingers on ribs).

Prime MEMOLUB MEMORY pump

Insert new battery pack and seal. NOTE: the battery seal can be removed for 480cc cartridges.

Squeeze air out of the cartridge

Replace cartridge on MEMOLUB MEMORY pump

Close and lock (fingers on ribs).

FAQ

How can I test and/or check if MEMOLUB MEMORY is functioning?

You can test and/or check whether MEMOLUB MEMORY is working correctly at anytime by unscrewing MEMOLUB MEMORY from its MEMO. Then push one the three switches at the bottom of the housing for a few seconds (in case there is only 1 ring in the MEMO, choose another switch than the corresponding one). MEMOLUB MEMORY will then make an expulsion to confirm that electronic, mechanical and batteries are ok.

Operate this operation three times pushing each switch at least once to ensure all three switches are operational and the complete gavage of the pump with the adequate lubricant. This operation has to be done with a cartridge inside the MEMOLUB MEMORY.

What to do if my MEMOLUB MEMORY automatic lubricator is not functioning?

Make a manual test of MEMOLUB MEMORY by using a MEMO with the three rings in the ring-holder.

If MEMOLUB® EPS MEMORY does not work, check the following:

- Is the voltage power supply ON?
- Does the voltage have the right amplitude (24Vdc) and polarity (brown=positive, blue=negative) ?

- Is there any discontinuity in the wiring?
- Are there one or more plastic rings inside the ring-holder? If not, no switch will be activated and MEMOLUB® EPS MEMORY will not work. Make sure you insert them correctly as explained in the installation guidelines.

What to do when there is no lubricant coming out of my MEMOLUB MEMORY?

If MEMOLUB MEMORY does function, but no grease comes out of the automatic lubricator, check the following:

- Is there a lubricant cartridge inside the MEMOLUB MEMORY? If not, recharge the unit with a cartridge as described in the installation guidelines.
- Was the spring mounted correctly inside the transparent housing? If not, please mount it again as described in the installation guidelines.
- Is the pump of the MEMOLUB MEMORY primed? If the cartridge of MEMOLUB MEMORY was totally emptied before replacement, some air could have been sucked into the system and the pump would cavitate for a certain number of cycles. Place a grease handgun on the suction valve of the blue housing and pump grease through the unit as explained in the installation guidelines.

What to do when the lubricant cartridge is not emptied correctly?

If MEMOLUB MEMORY does function but the lubricant cartridge does not empty or not in the predicted timing there might be that of the following issues occurs:

- The piping is clogged: use a handgun to clear the pipes.
- One of the outlets of the distributor block has been voluntarily obstructed. Use bridging elements to reduce the number of outlets of a distributor block.
- The piping is damaged. Replace the piping.
- Counter pressure at the MEMOLUB MEMORY outlet is higher than 13 bar: please respect the tubing diameters, tubing lengths, the number of outlets per distribution block and the working temperatures. Also, use fittings with openings larger than 4mm (0.157").
- At working temperature, the base oil viscosity of the grease is higher than 10.000cSt. Please use low temperature lubricants.

What to do when the lubricant does not reach the lubrication point?

MEMOLUB MEMORY does function and empties correctly, however no lubricant is reaching the lubrication point. Possible causes are:

- The piping might be damaged, please check and replace if necessary.
- A fitting is not correctly screwed or sealing is missing, please check and replace or add if necessary.

Does MEMOLUB® EPS MEMORY needs specific maintenance?

MEMOLUB MEMORY does not require any specific maintenance. When used in humid or dusty atmospheres MEMOLUB MEMORY can be cleaned with compressed air or a slightly humid rag. To clean MEMOLUB MEMORY do not use solvents or plunge unit in any liquid. It is also possible to equip your MEMOLUB MEMORY with a [protection cover](#). For additional information, please contact your local MEMOLUB dealer.

REGULATORY INFORMATION

SYMBOL	DESCRIPTION
	This product is compliant with Directives 2006/42/EC (Machinery). The relevant Declaration of Conformity is available here [https://memolub.eu/assets/uploads/Support/EPS/DoC-CE-EPS-2023.pdf] .
	This product is compliant with UK regulations 2008 No. 1597 (Supply of Machinery). The relevant Declaration of Conformity is available here [https://memolub.eu/assets/uploads/Support/EPS/DoC-UKCA-EPS-2023_2023-06-02-144148_owcm.pdf] .
	This product is compliant with customs union technical regulation TR CU 010/2011 (safety of machines and equipment). The relevant Declaration of Conformity is available here [https://memolub.eu/assets/uploads/Support/EPS/DoC-EAC-EPS-2023.pdf] .
	The WEEE symbol is attached to the product in compliance with the EU directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). It is intended to deter the improper disposal of this product and to promote reuse and recycling.
	The packaging material can be recycled. Please arrange for the environmental appropriate disposal of the packaging.
